Saga Surgical AB	Helsingborg	Saga Surgical's mission is to minimize the risk of infections by inventing safer medical needles. The company's needles focus on the very core of infection prevention: reducing bacterial transmission into the body. Widespread antibiotic resistance means that novel approaches for infection prevention are desperately needed. They develop patented and patent pending medical needles designed for a wide range of situations where there is a risk of infection. For example, prostate cancer is diagnosed using a biopsy needle. Up to 3% of biopsy procedures lead to sepsis, a life-threatening infection, and this number is on the rise. The infection is caused by bacteria brought into the body by the biopsy needle. Their biopsy needle design reduces the bacterial transmission by 96%.	www.sagasurgical.com	2016
Sangair AB	Lund	Sangair has developed a groundbreaking system to treat Sepsis. The system allows for a mild treatment of the patient's blood using active oxygen. The system can be attached to a patient and therefore slow down and control a sepsis infection by killing bacteria present in the blood. Another positive fact is that it also oxygenates the blood, which is beneficial due to the fact that oxygen levels usually are low in Sepsis patients.	sangair.se	2016
Sarstedt AB	Helsingborg	SARSTEDT Group develops, manufactures and sells equipment and consumables in the field of medicine and research.	www.sarstedt.com	1973
Sawbones Europe AB	Malmö	Sawbones Europe AB creates medical training display and simulation models.	www.sawbones.com
